NORBERT KROL

JUNIOR AI/ML DEVELOPER | AWS AIF-C01 CERTIFIED

Godalming • Settled Status • Mobile: 07510 713712 • Email: norbikrol@protonmail.com
• LinkedIn • GitHub • Website

KEY SKILLS:

- Machine Learning
- Natural Language Processing (NLP)
- Computer Vision
- Deep Learning
- Python
- TensorFlow & Keras
- Data Preprocessing & Cleaning
- Feature Engineering
- Model Evaluation & Optimisation
- AI Application Development
- API Development & REST APIs
- Amazon AI Fundamentals
- React & TypeScript
- AWS
- Data Processing & Visualisation

PERSONAL STATEMENT:

A motivated and enthusiastic newly qualified AI Developer with several years of self-taught programming experience and a strong passion for software development, problem-solving and emerging technologies. My programming journey has progressed from HTML, CSS and PHP to JavaScript and Vue.js, with a current focus on Python. I also have practical experience working with SQL databases and enjoy building software solutions, working with data and exploring the possibilities of artificial intelligence.
I am an organised, curious and detail-oriented individual with a strong analytical mindset and a genuine enthusiasm for learning. Comfortable working both independently and as part of a team, I have developed excellent communication, time-management and organisational skills through customer-facing roles and balancing full-time employment with ongoing study. I am now eager to apply my Python programming, software development and AI knowledge in an AI or data-focused role, where I can contribute my problem-solving abilities, continue developing my technical skills and grow within this exciting and rapidly evolving industry.

TRAINEESHIP:

Sept 2025 – Sept 2026 **IT Career Switch**
AI Technician Traineeship

- **Machine Learning & Data Preparation**: Designed, trained, evaluated and optimised machine learning models, applying data cleaning, preprocessing, feature engineering and model evaluation techniques to practical business problems.
- **Deep Learning & Computer Vision**: Developed deep learning solutions using CNNs and RNNs, applying image preprocessing, feature extraction and model optimisation techniques to image recognition, pattern analysis and predictive modelling.
- **Natural Language Processing (NLP)**: Built AI solutions to process, analyse and summarise unstructured text using text preprocessing, language modelling and transformer-based techniques.
- **AI Application Development & Deployment**: Built and deployed end-to-end AI applications, exposing machine learning models through APIs and deploying solutions within cloud-based environments.

- **Microsoft Azure & Responsible AI**: Developed practical knowledge of Microsoft Azure AI services, cloud-based machine learning concepts and responsible AI principles, including ethical AI development and governance.
- **Software Development Practices**: Applied version control, debugging, testing and technical documentation throughout AI projects, using structured development practices to troubleshoot issues and communicate technical concepts clearly.

  Certification Gained: AWS AIF-C01 – AI Practitioner

PROJECTS:

Portfolio Project #1 Natural Language Processing Project (Radiology Report Text Summarisation): Developed and deployed an AI-powered Natural Language Processing (NLP) application to generate concise summaries from free-text radiology reports. Applied data preprocessing, model training, evaluation, and API deployment techniques to deliver an end-to-end AI solution suitable for real-world use.
Key Skills Applied: *Natural Language Processing (NLP)* | *Data Preprocessing* | *Machine Learning* | *Model Evaluation* | *API Development* | *AI Deployment*

Portfolio Project #2 Computer Vision Project (Image-Based Fashion Recommendation System): Developed and deployed a computer vision application capable of recommending visually similar clothing items from user-uploaded images. Applied image preprocessing, feature extraction, deep learning, and model deployment techniques to deliver a fully functional AI recommendation system.
Key Skills Applied: *Computer Vision* | *Deep Learning* | *Image Processing* | *Feature Extraction* | *Model Deployment* | *AI Application Development*

CAREER HISTORY:

Apr 2018 – Present **Royal Mail Group**
POSITION HELD: **Postal Worker**

- Further developed customer service and communication skills
- Worked in an extremely fast-paced and diverse environment, continuing to build confidence in working under pressure, utilising strong planning, organisational and adaptational skills
- Worked as part of a large team to process daily workflow and worked independently within the local community; developed strong teamwork and organisation skills
- Experienced in following company policies and procedures, whilst working in line with strict OFCOM regulations and National Agreements with the Trade Unions
- Responsible for personal workload each day, ensuring OFCOM regulations were met in the form of secure and timely deliveries
- Planned daily delivery route in line with workload and company goals
- Maintained high levels of health and safety whist performing delivery work, and whilst working with company machinery, equipment and moving vehicles at our busy office locations
- Sorted large volumes of live mail accurately to ensure daily workloads were processed in line with service level agreements

Nov 2017 – Apr 2018 **Wayside Pub**
POSITION HELD: **Kitchen Porter**

- Maintained a clean, safe, and efficient kitchen environment by washing and sanitising crockery, cutlery, and cooking equipment during busy service periods
- Supported chefs and front-of-house staff with food preparation, stock deliveries, and waste disposal, helping the kitchen run smoothly and meet food hygiene standards

Nov 2016 – Nov 2017 **Surrey Homewares**
POSITION HELD: **Supervisor**

- A varied and customer-facing role in a busy retail environment with a focus on delivering high levels of customer service
- Responsible for planning and organising daily tasks throughout the team, whilst monitoring workload and progress
- Led the team in taking client phone calls, and responded promptly to customer email enquiries
- Cash handling, including till floats, banking and regular stock counts
- Planned and organised daily tasks, delegation and task planning, driving high levels of customer service throughout the team, taking client calls and responding to email enquiries

Oct 2012 – Nov 2016 **Upper Crust**
POSITION HELD: **Team Leader/Holding Store Manager**

- Worked in a fast-paced environment with high customer traffic, responsible for all aspects of the store's daily operations, from compliance and health and safety to banking and planning staff rotas
- Main responsibilities included stock management, staff rotas, daily/weekly banking, display and monitoring of store KPIs, and training new staff

Jul 2011 – Oct 2012 **Fargo Systems, Poland**
POSITION HELD: **Machine Operator**

- Worked with specialist tools and machinery to produce pre-fabricated materials for commercial buildings

EDUCATION:

2026 AWS Certified AI Practitioner

Technical College, Sosnowiec, Poland
Three A-Levels (Equivalent)

TECHNICAL SKILLS:

- **Programming Languages**: Python, JavaScript
- **Machine Learning & AI**: Machine Learning, Deep Learning, CNNs, RNNs, Natural Language Processing (NLP), Computer Vision
- **AI Frameworks & Libraries**: TensorFlow, Keras, NumPy, pandas, FastAPI
- **Data Processing**: Data Cleaning, Data Preprocessing, Feature Engineering, Model Evaluation

- **Cloud & AI Services**: AWS AI/ML Services, AIF-C01 Fundamentals, Responsible AI Principles
- **Deployment & DevOps**: Docker, Hugging Face Spaces, Render, PythonAnywhere, REST APIs
- **Version Control**: Git, GitHub
- **Additional Technologies**: HTML, CSS, SQL, PHP, Vue.js, R, Flask, StreamLit
